

Linking Reading Instruction and Assessment Supplemental ESL and ABE Textbooks CASAS Levels and Basic Skills/Content Standards

The following textbooks can be used to supplement a core text series to provide extended instruction and practice in reading basic skills or content standards. Note that the texts are listed according to CASAS Levels A, AX, B, and C. For a complete list of CASAS Basic Skills Content Standards visit www.casas.org

Guidelines for selecting supplemental textbooks:

- ✚ For ESL instruction, consider learner abilities in listening, speaking, and writing when selecting a reading text so that the material will be level-appropriate for all skills.
- ✚ Reading texts often address life skills as well as content standards. It's important to select materials with high interest content as well as targeted basic skills.
- ✚ Link assessment to instruction using the CASAS Class Profiles as well as Content by Item competency lists (available on CASAS website). These resources assist in identifying competencies (life skills) that demonstrate learner strengths and provide diagnostic information and inform instruction.
- ✚ Many of the textbooks listed are designed for group instruction. Consider your instructional delivery mode and evaluate the versatility of unit exercises and activities especially when adapting a text for individual instruction in a lab setting.
- ✚ For more information about the textbooks listed, contact individual publisher representatives.
